OBJECTIVE | **Driven high school student with a passion for coding, teaching, and good design.**

SKILLS & ABILITIES | Full-stack development: React as well as vanilla on the frontend. Node, Flask, and AWS Lambda on the backend.

UX design for both websites and apps.

Strong background in teaching coding at various institutions — currently using PICO-8.

Python, C++, Java, Lua, Matlab (Octave), ES7, Typescript, and Haxe.

Linux administration, including managing and hosting various backends and databases.

Cross-platform mobile app development with React Native.

Video game design and development in C++, Haxe, and Lua.

LANGUAGES | English, Russian and Spanish

EXPERIENCES | **CS workshop leader at YOUMedia**
December 2017 – present
Teaching coding at Chicago Public Library helps me fine-tune my approach and exposes me to new environments.
Hackclub organizer
September 2017 – present
Organizing my school's first coding club has taught me a lot about getting people excited about coding.
Hackathon organizer at StudentRND
September 2017 – present
I helped double CodeDay Chicago's registration by proactively working with sponsors and leading workshops for beginners.
Front-end developer at Link Media LLC
June 2017 – January 2018
I worked on Link's website and React Native app.
Internship at Art Lebedev Studio, Moscow
June 2017 – July 2017
I developed my sense of design while working at one of Russia's most renowned design studios.

EDUCATION | 4.0 GPA sophomore at Northside College Prep

2 years of IB education — **IB student of the year 2013-2014**
